

Trigonometrie Aufgabe 23

Wie groß sind a und c, wenn $\alpha = 67^\circ 38'$ und $b = 25,42 \text{ cm}$?

$$67^\circ 38'$$

$$38' = \frac{38}{60}^\circ = 0,63^\circ$$

$$67^\circ 38' = 67,63^\circ$$

$$\cos \alpha = \frac{b}{c} | *c$$

$$\cos \alpha * c = b | : \cos \alpha$$

$$\mathbf{c = \frac{b}{\cos \alpha} = \frac{25,42 \text{ cm}}{0,3806} = 66.8 \text{ cm}}$$

$$\tan \alpha = \frac{a}{b} | *b$$

$$b * \tan \alpha = a$$

$$\mathbf{a = 25,42 \text{ cm} * 2,4298 = 61,8 \text{ cm}}$$
